QA Engineer Intern

Summary

Motivated ISTQB-certified tester with a strong understanding of SDLC and Agile methodologies. Possesses a solid foundation in software testing principles, bug tracking, and test case development. With six years of experience in SEO, I have developed a keen eye for detail and a strong ability to analyze requirements, identify gaps, and report bugs. Highly motivated to transition into a QA role to leverage my skills and contribute to quality assurance processes.

Skills: design and execute manual test cases to validate software functionality.

Tools and technologies: HTML/SS, MySQL, Jira, Postman, DevTools, GIT, Fiddler, Selenium IDE, XML, JSON, Source Tree, Agile, Scrum, Bugzilla, ASANA.

Management: organized and attentive to the details; ability to work independently and as part of a team; solution-focused.
